

February 2017 - Newsletter

BAPS - CASS 39

British Association of Paediatric Surgeons Congenital Anomalies Surveillance System

The national system to study the surgical management of a range of neonatal conditions – enabling national audit in neonatal surgery

BAPS-CASS moving to email reporting!

From March 2017 BAPS-CASS will cease sending out monthly report cards and begin collecting monthly reports via email. At the beginning of each month reporters will receive an email requesting a report. To report simply reply to the email with the number of cases your unit has had in that given month. Just as when reporting on the cards, it is still vital that you report even when you have had no cases. Data collection forms will be sent out via post as normal. If you need to update your email address, or you have any other questions or queries please contact the BAP-CASS team at baps-cass@npeu.ox.ac.uk

BAPS-CASS Publications Update

NEC

birth data paper was published in Nature: Scientific reports in January 2017

Hirschsprung's Disease

Disease birth data paper has been accepted by Archives of Diseases in Childhood – Coming Soon

Oesophageal Atresia

Long gap data has been published in JPS in February 2017

Chocolate Box

Chocolates this month go to Thanos Tyraskis for picking up the reporting for King's College Hospital and trying to get up to date with form returns

Many thanks from the BAPS-CASS team!

New Healthtalk.org Module Launched

Healthtalk.org have launched a new module on parents' experience of neonatal surgery. Conditions studied include exomphalos, gastroschisis and Hirschsprung's disease. This is a great resource for both families and surgeons to see from a parent's perspective what it's like to have a child requiring neonatal surgery. The module can be accessed here:

<http://healthtalk.org/peoples-experiences/pregnancy-children/parents-experiences-neonatal-surgery/topics>
