

# Maternal, Newborn and Infant Clinical Outcome Review Programme

<b>UPCARE: 1.00</b> <b>Programme name -</b> <b>please do not change</b> <b>this field.*</b>	Maternal, Newborn and Infant Clinical Outcome Review Programme
<b>1.01 Abbreviation</b>	MNI known also as MBRRACE-UK (Mothers and Babies: Reducing Risk through Audits and Confidential Enquiries across the UK)
<b>1.1 Contract status</b>	Ongoing
<b>1.2 Audit or non-audit</b>	Non-audit
<b>1.3 HQIP</b> <b>commissioned*</b>	Yes
<b>1.40 Programme</b> <b>unique identifier*</b>	HQIP226
<b>1.41 HQIP AD</b>	TS
<b>1.42 HQIP PM</b>	GC
<b>1.5 Lead organisation*</b>	University of Oxford
<b>1.6 Programme</b> <b>homepage*</b>	<a href="http://www.npeu.ox.ac.uk/mbrance-uk">http://www.npeu.ox.ac.uk/mbrance-uk</a>
<b>1.7 Programme</b> <b>summary</b>	<p>The MBRRACE-UK collaboration is responsible for running the national <u>Maternal, Newborn and Infant clinical Outcome Review Programme (MNI-CORP)</u>. The main purpose of MBRRACE-UK is to conduct robust national surveillance and confidential enquiries to investigate the deaths of women and babies who die during pregnancy or shortly after pregnancy in the UK. By investigating these deaths, MBRRACE-UK hopes to prevent similar deaths or serious complications in the future. The overarching aim of MBRRACE-UK is to support the delivery of safe, equitable, high-quality and patient-centred maternal, newborn and infant health services.</p>
<b>2.1 Organogram</b>	<a href="https://www.npeu.ox.ac.uk/mbrance-uk/the-collaboration#governance-structure">https://www.npeu.ox.ac.uk/mbrance-uk/the-collaboration#governance-structure</a>
<b>2.2 Organisations</b> <b>involved in delivering</b> <b>the programme</b>	<p>MBRRACE-UK consists of two sub-programmes of work. The maternal programme of MBRRACE-UK is run out of the National Perinatal Epidemiology Unit (NPEU) at the University of Oxford. The perinatal programme is led by the TIMMS research group at the University of Leicester.</p> <p>The programme collaborates with representatives from Chelsea and Westminster NHS Foundation Trust and the Newcastle upon Tyne Hospitals NHS Foundation Trust who provide clinical input and help steer the programme. We also have collaborators from Sands and National Maternity Voices who provide PPI input and</p>

help steer the programme. For additional PPI input, we also have a wide range of third sector stakeholders who we regular work with on lay summaries and other public facing outputs.

A full list of MBRRACE-UK collaborators and third sector stakeholders is available online: <https://www.npeu.ox.ac.uk/mbrpace-uk/the-collaboration>

### **2.3 Governance arrangements**

All data analysis and surveillance reports are prepared by the maternal team at the University of Oxford and the perinatal team at the University of Leicester. All data entered into the secure MBRRACE-UK system are quality assessed by the Oxford/Leicester teams and by the trusts/health boards who provided the data. The individuals responsible for the analysis and reporting of surveillance data are listed in the authorship of the reports/chapters.

For reports that include confidential enquiries, expert assessors contribute to the review of cases and report writing. Their individual contributions are also noted in the report/chapter authorship.

The professional and third sector stakeholders are consulted on various aspects of the programme at a yearly stakeholder meeting and at other times as needed. The third sector stakeholders are also involved in the writing of lay summaries to help ensure messages are disseminated more widely.

All reports are subject to sign off from HQIP and other funders including NHS England and representatives from the Welsh and Scottish governments and NIMACH in Northern Ireland. This sign off follows standard reporting procedures as outlined in the technical manual. Prior to submission, the maternal and perinatal teams meet with HQIP and representatives from the advisory group to discuss the report findings and recommendations.

### **2.4 Stakeholder engagement**

The professional and third sector stakeholders are consulted on various aspects of the programme at a yearly stakeholder meeting and at other times as needed.

The third sector stakeholders are involved in the writing of lay summaries to help ensure messages are disseminated more widely. Two third sector stakeholder groups, Sands and National Maternity Voices are also part of the MBRRACE-UK collaboration.

We rely on professional stakeholders including royal colleges to help disseminate the findings. We also work alongside professional stakeholders as needed to update guidance or recruit expert assessors for confidential enquiries.

### **3.1 Quality improvement goals**

The overarching healthcare improvement aim of MBRRACE-UK is to conduct maternal and perinatal mortality surveillance and confidential enquiries to quantify and assess the quality of maternity, neonatal and other services relevant to pregnant and postpartum women and newborn babies. This is in order to stimulate healthcare improvements in clinical quality and safety by enabling clinicians, managers, commissioners and policy makers to learn systematically from adverse events, reduce inequalities and attain parity of esteem.

The objectives of this programme of work are to:

- Assess the quality and safety of maternity and infant services
- Support improvements in service quality through national learning
- Produce evidence-based recommendations and good practice points
- Influence clinical practice, service provision, health policy and clinical education

It is our aim that through these objectives the UK will see reductions in maternal and perinatal mortality and fewer disparities in mortality based on ethnicity, deprivation and other characteristics.
