

Royal College of Obstetricians and Gynaecologists

Newsletter 10: July 07

First UKOSS Annual report released!

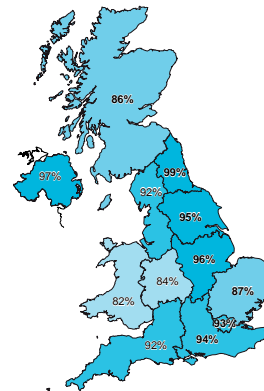

Enclosed with this newsletter you should

find a copy of the first UKOSS Annual Report 2007. This report provides a comprehensive overview of the data collected from the UKOSS studies in 2007. It details the number of cases reported for each study, compares these to the expected number of cases, and discusses the implications of the findings. The report also highlights the contributions of the reporting anaesthetists, midwives, obstetricians, and risk managers throughout the UK who have made this work possible.

Annual Report 2007

We would like to thank all the reporting anaesthetists, midwives, obstetricians and risk managers throughout the UK who have contributed to UKOSS, without whom this work would not have been possible.

Cases reported for current studies
