Out of 782,720 births* in 2015...

- **3,032** stillbirths
- **1,360** neonatal deaths

* of babies delivered from 24 weeks of pregnancy, excluding terminations of pregnancy

In addition, over 850 babies died at 22 and 23 weeks of pregnancy.

11% of stillbirths did not have placental pathology.

Data by Neonatal Network (England and Scotland) and Country (Wales and Northern Ireland).

Fall in death rates

- **4.20** stillbirths per 1,000 births in 2013
- **1.84** stillbirths per 1,000 births in 2015

- **3.87** neonatal deaths per 1,000 births in 2013
- **1.74** neonatal deaths per 1,000 births in 2015

Over 700 babies died due to a congenital anomaly.

Rates varied widely across the UK:

- **Scotland**: 0.6 - 0.9 per 1,000 births
- **Northern Ireland**: 1.74 - 3.87 per 1,000 births
- **England**: 2.8 per 1,000 births
- **Wales**: 0.5 - 1.9 per 1,000 births
